PROFESSIONAL SUMMARY

Software Development Engineer aspirant with expertise in Python, Java, SQL, Django, Flask, REST APIs, and MERN Stack. Experienced in designing, developing, and deploying full-stack and AI-powered applications with a strong understanding of Data Structures, Algorithms, OOP, DBMS, OS, and Computer Networks. Completed industry-focused internships in Machine Learning and Software Development. Passionate about building scalable, efficient, and user-centric software solutions.

EXPERIENCE

HBIC Solutions | Machine Learning Intern May 2025 – Jun 2025

Tech stacks used: Python, Pandas, NumPy, Scikit-learn, TensorFlow, Matplotlib, REST APIs

- Performed data preprocessing, exploratory data analysis, and visualization using Python libraries to prepare real-world datasets for ML modeling.
- Evaluated model performance using accuracy, precision, recall, and F1-score metrics along with cross-validation techniques to ensure robustness and reduce overfitting.

Google Virtual Internship | AI-ML Intern Apr 2024 – Jun 2024

Tech stacks used: Python, Pandas, NumPy, Scikit-learn, TensorFlow, YOLOv5, Faster R-CNN, Google Colab

- Completed a structured virtual internship focused on AI and ML fundamentals, applying concepts such as model training, evaluation metrics, and real-time testing.
- Built and deployed 3+ ML models using Google Colab, demonstrating hands-on proficiency in end-to-end model development and deployment pipelines.

PROJECTS

AI-Driven Multimodal Disaster Detection System | Python, OpenCV, TensorFlow, NLP, CNN, Flask, Mar 2026

- Developed an AI-powered multimodal disaster detection system integrating image, text, and sensor-based inputs using TensorFlow, OpenCV, CNN, and NLP models to improve prediction accuracy.
- Designed and exposed REST API endpoints via Flask for real-time risk monitoring and alert visualization, reducing disaster response time through early warning generation.

ResumeGap-AI | MERN Stack, JWT Auth, REST API, OpenRouter AI, Puppeteer Feb 2026

- Developed a full-stack AI-powered resume analysis platform using MERN Stack and OpenRouter LLM APIs featuring ATS score calculation, skill-gap detection, and interview preparation workflows.
- Built an automated PDF generation pipeline using Puppeteer and dynamic HTML templates; integrated JWT authentication and RESTful APIs for secure, scalable user management.

Predictive Maintenance Using Machine Learning | Python, Pandas, NumPy, Scikit-learn, Flask, REST API Aug 2024

- Developed a Predictive Maintenance system using ML on 10,000+ records to identify potential machine failures with high precision, improving maintenance planning efficiency.
- Deployed the trained ML model as a Flask REST API to provide real-time predictions, enabling proactive maintenance decisions and reducing unplanned downtime.

EDUCATION

Geethanjali College of Engineering and Technology, Hyderabad 2023 – 2026

B.Tech – Data Science Engineering (CGPA: 7.53/10)

TRR College of Polytechnic, Hyderabad 2020-2023

Diploma – Mechanical Engineering (CGPA: 8.86/10)

SKILLS

Languages: Python, Java, JavaScript, SQL

Frameworks & Libraries: React.js, Node.js, Express.js, Flask, Django, Scikit-learn, TensorFlow, Pandas, NumPy

Web Development: MERN Stack, REST APIs, HTML, CSS, JWT Authentication

Databases: MySQL, MongoDB

Core Computer Science: Data Structures & Algorithms, OOP, DBMS, OS, Computer Networks, System Design

Platforms & Tools: Git, GitHub, Docker, VS Code, Google Colab, LeetCode, HackerRank, Postman

ACHIEVEMENTS & CERTIFICATIONS

- Solved 500+ DSA problems** across LeetCode, GeeksforGeeks, and HackerRank.
- 5★ Gold Badge** in Problem Solving on HackerRank.
- Oracle Certified** – Java Programming.
- Cisco Certified** – Python Programming.
- SQL Certification (Basic & Intermediate)** – HackerRank.
