OBJECTIVE

Detail-oriented Machine Learning and AI graduate skilled in Python, SQL, and statistical modeling, with hands-on experience in developing and evaluating machine learning models. Seeking an entry-level ML Engineer or Data Scientist role to contribute to innovative projects and drive actionable insights through data.

EDUCATION

Geethanjali College of Engineering and Technology, Hyderabad

August 2023 - Present

B. TECH - DATA SCIENCE ENGINEERING (CGPA: 7.5/10)

TRR College of Polytechnic, Hyderabad

August 2020 – May 2023

DIPLOMA - MECHANICAL ENGINEERING (CGPA: 8.86/10)

SKILLS

Languages : Python, Java, SQL
Frame Works : Django, Devops
Databases : MySQL, MongoDB
Platforms & Tools : Git, GitHub, Leetcode, Hackerrank
Core Computer Science : Data Structures and Algorithms, Machine Learning, Object-Oriented Programming, Operating Systems, Database Management Systems

INTERSHIPS

Machine Learning Intern – HBIC Solutions

May 2025 – May 2025

- Completed Data Science Fundamentals training with Excellent performance, mastering Python-based data analysis and visualization tools.
- Applied machine learning algorithms to real-world datasets, covering data preprocessing, EDA, and model evaluation.

Google AI-ML Virtual Internship

April 2024 - June 2024

- Built and evaluated predictive models with Python, Scikit-learn, and TensorFlow on real-world datasets.
- Applied supervised and unsupervised learning techniques and validated outcomes through standard evaluation metrics.

PROJECTS

Predictive Maintenance Using Machine Learning

Sep 5 - 2025

- Developed a Predictive Maintenance system using Machine Learning on a dataset of 10,000 records to identify potential machine failures and improve maintenance planning.
- Built and trained the ML model using Python, Pandas, and Scikit-learn, and deployed it through a Flask API to provide real-time predictions.
- Designed a full-stack application with React.js frontend and Node.js/Express backend, using a modular architecture that separates the client (React + ML API) and server for better scalability and maintainability.

Heart Disease Prediction using Machine Learning

May 25- June 2025

- Built a machine learning model to predict heart disease presence using clinical and lifestyle-related patient data.
- Performed data preprocessing including handling missing values, encoding categorical features, and scaling numerical attributes.
- Trained and evaluated multiple models including K-Nearest Neighbors, Logistic Regression, SVM, Decision Tree, AdaBoost, and Gradient Boosting.
- Assessed model performance using accuracy, precision, recall, and F1-score to identify the most reliable classifier.

ACHIEVEMENTS AND CERTIFICATES

- Java Programming – Oracle Certified | [View](#)
- Python Programming – Cisco Certified | [View](#)
- SQL Certification (Basic & Intermediate) – HackerRank | [View](#)
